the passion for detail"*

METAL STAMPING SERVICES

JOM 

METAL STAMPING SERVICES

JOM 

Founded by **Mr. Josep Calls Sarroca**, The company started its activity at 1975, as die-tooling workshop.

The company has expanded, over time, with the aim of offering an all-inclusive solution **to cover all the requirements of supplying metal pieces, with and without investment in die-tooling.**

Nowadays, Company, with a usable floor area of 2800 m², focuses on 3 business divisions:

- Die tooling construction
- Metal Stamping
- Sheet Metal

TECHNICAL DEPARTMENT

Technology & experience to give the best service

In our technical department we have **2D and 3D design tools** and, and highly qualified staff, which allows us to offer to our customers our support for the development of their projects.

The same design process allows us to detect possible functional problems of the part by collisions or interferences and thus we can solve them before they occur.

We bring our knowledge and experience in working with the client in order to ensure proper industrialization project.

We are proactive, **we like to provide ideas and proposals** to help improve designs, and to optimize manufacturing costs.

We can work as another **extension of our customer's** technical department.

Metal stamping

DESCRIPTION OF SERVICE

Metal stamping from 20 up to 250 tons with progressive die tools, or phases die tools. We have our own tooling workshop. We manufacture different metal parts for different applications.

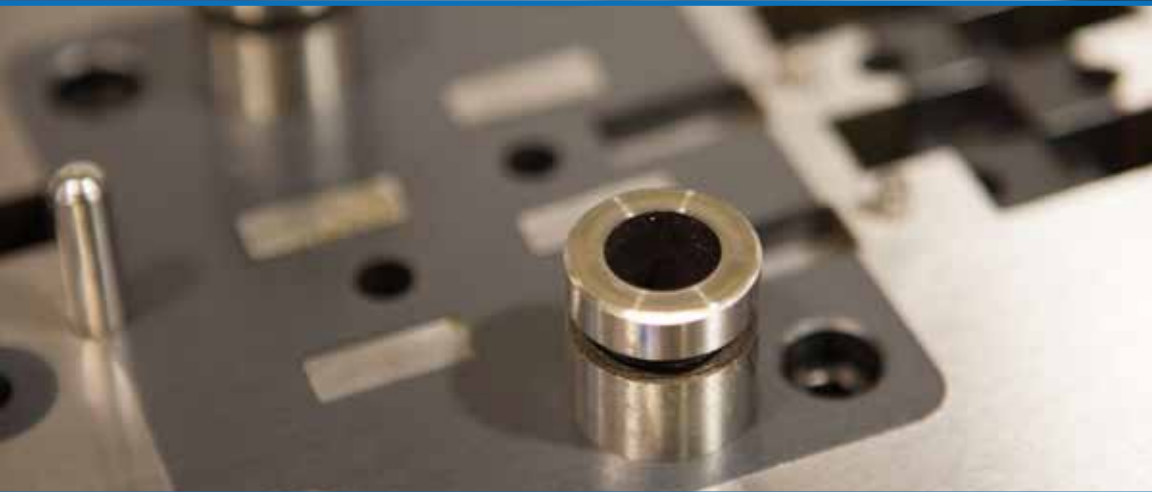

We provide the best solution to optimize the production process of the part, in order to offer a competitive price while maintaining our quality standards.

BENEFITS OF OUR WAY OF WORKING?

Our versatility. We have experience as **metal stamping manufacturer** for companies from different sectors (automotive, electricity, motorbikes, air conditioning, lighting, gaming industry, electricity, construction, machinery, , etc.). This allows us to adapt our processes and quality standards , according to the needs of each customer and the sector to which it belongs.

We are genuine professionals of metal stamping, our more than 40 years and many customers support us.

Die tooling

DESCRIPTION OF SERVICE

Die tooling construction for own consumption and also to third parties. We build **all kind of progressive die tools**, for our own production in our facilities or outside our factory. The company's philosophy is based on insourcing all direct production processes that are involved in the manufacturing of the **die tool** from the project, until the last technical adjustment.

BENEFITS OF OUR WAY OF WORKING?

We have our own engineering department for the development of **die tool project**. We have the necessary human and technological resources, to solve all the needs of our customers.

We add value to our service through the experience and know-how gained in over 40 years.

We internalize all production processes of the construction of die tool. because, thus, we get experience and we help to contain the cost of investment by not increasing the the processes costs, with third-party intervention.

Sheet metal

DESCRIPTION OF SERVICE

Laser cutting, punching, Bending, welding, etc.. are some of the services we offer to our customers for **manufacturing parts without die tools**.

BENEFITS OF OUR WAY OF WORKING?

Agility. A direct and personalized treatment. Reliability on agreed deadlines and commitments. Manufacturing without expensive tooling investments. **Highly-skilled and prepared section** to provide a complete and professional service.
